Tempotest Home® Etamine

This luxurious lightweight fabric can be used in many applications throughout the home where visual comfort and privacy is preferred. Crafted and woven in Italy, it is perfect for softening spaces with drapery or curtains for windows, balconies, pergolas, and gazebos.

Tempotest Home® Etamine is the perfect combination of elegance and performance. It is highly UV resistant, and as a solution-dyed fabric, the color will remain vibrant even after extended sun exposure.

In addition to being inherently resistant to mold, salt-water, and most air-borne pollutants, the fabric's proprietary finish also makes it water repellent and oil cleanable, which will allow your fabric to maintain its beauty with minimal maintenance and cleaning.
